

Whether you are looking for a complete design or a few ideas to help you along, our design team is here to assist you. Shown are a few sample designs.

**A.** This design utilizes the VintageView® Floor-to-Ceiling Frames (FCF). The three bottle deep racks face in toward the cellar for storage capacity, while the one bottle deep racks face out toward the glass wall bordering a dining area for customer viewing.

**B.** Wine cellars are increasingly in demand as home features. For a fraction of what custom wood racking costs, our design team can help you create a custom look for your cellar while staying within your budget and working with your individual needs.

C. Typically wasted space, such as the area under stairs, can become a beautiful and practical wine cellar. This design features our interlaced neck mounting.

D. Our design team will gladly work with you and your architect to create the perfect restaurant or store design.

With our design team and VintageView® products, you may rest assured that your wine will receive all the attention it deserves.
